

Assignment 7

Use appropriate joins to solve following queries.

Note: To solve below queries, use “sales” database.

1. Write a query that lists each order number followed by the name of the customer who made the order.

```
kd1_99523_sandhya1> select o.onum,c.cname from customers c
-> INNER JOIN orders o ON c.cnum=o.cnum;
+-----+-----+
| onum | cname |
+-----+-----+
| 3001 | Cisneros |
| 3003 | Hoffman |
| 3002 | Pereira |
| 3005 | Liu |
| 3006 | Cisneros |
| 3009 | Giovanni |
| 3007 | Grass |
| 3008 | Clemens |
| 3010 | Grass |
| 3011 | Clemens |
+-----+-----+
10 rows in set (0.00 sec)
```

2. Write a query that gives the names of both the salesperson and the customer for each order along with the order number.

```
kd1_99523_sandhya1> select onum, s.sname,c.cname from orders o
-> INNER JOIN customers c ON o.cnum=c.cnum
-> INNER JOIN salespeople s ON o.snum=s.snum;
+-----+-----+-----+
| onum | sname | cname |
+-----+-----+-----+
| 3003 | Peel | Hoffman |
| 3009 | Axelrod | Giovanni |
| 3005 | Serres | Liu |
| 3010 | Serres | Grass |
| 3007 | Serres | Grass |
| 3011 | Peel | Clemens |
| 3008 | Peel | Clemens |
| 3006 | Rifkin | Cisneros |
| 3001 | Rifkin | Cisneros |
| 3002 | Motika | Pereira |
+-----+-----+-----+
10 rows in set (0.00 sec)
```

3. Write a query that produces all customers serviced by salespeople with a commission above 12%. Display the customer's name, the salesperson's name, and the salesperson's rate of commission.

```
kd1_99523_sandhya1> select c.cname,s.sname,s.comm from customers c
-> INNER JOIN salespeople s ON c.snum=s.snum
-> where comm>0.12;
```

cname	sname	comm
Liu	Serres	0.13
Grass	Serres	0.13
Cisneros	Rifkin	0.15

3 rows in set (0.00 sec)

4. Write a query that calculates the commission earned by each salesperson for orders placed by customers with a rating above 100.

```
kd1_99523_sandhya1> select o.onum,s.comm,(o.onum* s.comm) from orders o
-> INNER JOIN salespeople s ON o.snum=s.snum
-> INNER JOIN customers c ON o.cnum=c.cnum AND rating >100;
```

onum	comm	(o.onum* s.comm)
3010	0.13	391.30
3007	0.13	390.91
3005	0.13	390.65
3006	0.15	450.90
3001	0.15	450.15
3009	0.10	300.90

6 rows in set (0.00 sec)

5. Write a query that produces all pairs of salespeople who are living in the same city. Exclude combinations of salespeople with themselves as well as duplicate rows with the order reversed.

```
kd1_99523_sandhya1> select s1.sname,s2.sname,s1.city from salespeople s1,salespeople s2 where s1.city=s2.city AND s1.sname<s2.sname;
```

sname	sname	city
Motika	Peel	London

1 row in set (0.00 sec)
